

## Macintosh Island North Bridge Piling

**From Monday 29 October 2012, construction of the shared light rail and pedestrian bridge at Macintosh Island North will recommence.**

**Works, involving sheet and pier piling, excavations and crane movements were halted to facilitate the Armor All Gold Coast 600.**

### Ongoing works:

- To facilitate piling and crane movements, short-term traffic holds on the Gold Coast Highway northbound will occur up to three times per day.
- Heavy machinery, including excavation, piling and crane movements.
- Construction noise, dust and vibration. Every effort will be made to minimise these impacts. Noise and vibration from piling operations will be monitored to ensure compliance with residential noise regulations.
- Pedestrian access under the bridge will be closed during construction activities and footpath closures near the active work area will occur. Alternative pedestrian routes will be signed.
- Marine access under the Macintosh Island North Bridge will be intermittently closed for public safety.
- The majority of construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.

We apologise for any inconvenience and thank you for your patience during construction.
