

## Queen Street westbound lane closure

From Tuesday 27 November 2012, there will be daytime lane closures for westbound traffic in Queen Street, between Nerang Street and Mal Burke Street.

Traffic changes will take place from 9:30am to 2:30pm between Monday and Friday for approximately three weeks to facilitate rail deliveries and concrete pours for the track slab.

Local access for residents will be maintained, but there will be some restrictions on entry and exit points. There will be traffic controllers in place to assist residents.

This is the final light rail track to be laid along Queen Street - the first complete section of tracks for the 13-kilometre corridor.

### Traffic changes:

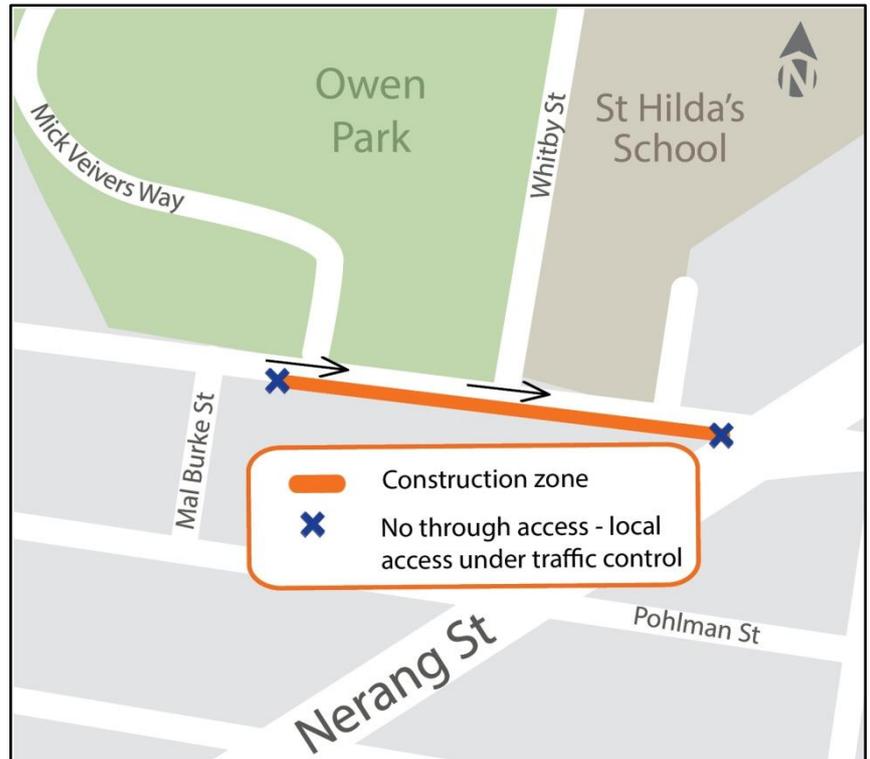

- The westbound lane of Queen Street will be closed between Nerang Street and Mal Burke Street (see map).
- Access for local residents will be maintained under traffic control. Residents may be directed to another entry or exit point.
- Residents need to be aware that following traffic control directions is vital for their safety.

### What to expect:

- Heavy machinery, such as excavation and crane movements to facilitate construction activities.
- Construction noise, dust and vibration at times. Every effort will be made to minimise these impacts.
- GoldLinQ will work directly with affected residents on waste and vehicle arrangements.
- Rail deliveries, track laying, concrete pouring and finishing works – each piece of rail is 18 metres in length weighing one tonne.
- Pedestrian access routes will be maintained around the construction area.
- Timing of this work is subject to weather conditions and construction constraints.

### About GoldLinQ:

In June 2011 GoldLinQ was awarded the contract to design, build and operate Stage One of the light rail system scheduled to commence operations in 2014. McConnell Dowell (MacDow) and Bombardier Transport (BT) Joint Venture are the design, construct and delivery arm of the GoldLinQ consortium. MacDow will design and deliver the track works, roadworks, bridges, station structures and buildings. BT will deliver the rail systems including design and installation, and bring into service the rail systems, rail power and light rail vehicle.

West bound lane closure on Queen Street.

We apologise for any inconvenience and thank you for your patience during construction.
