

St Kilda Avenue intersection night works

From Sunday 17 March 2013, GoldLinQ will begin installing public utility infrastructure at the intersection of St Kilda Avenue and the Gold Coast Highway. These works are anticipated to take a week to complete, weather permitting.

Traffic changes:

- Periodic lane closures of the Gold Coast Highway
- Temporary footpath closures near the active work area will occur and alternative routes will be signed.

Night works:

- Night works will be required as part of these works to minimise the impact on businesses, pedestrians and traffic. Affected businesses and residents will be notified in advance of night works.
- Night works will occur from 6:30pm to 5:00am.
- During night works vehicles will use "quacker" (quieter) style reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.

What to expect:

- Installation of safety barriers and fencing to contain the construction area.
- Construction works in the road reserve and on foot paths bordering the intersection.
- Heavy machinery, such as excavation and crane movements to facilitate construction activities.
- Construction noise, dust and vibration at times. Every effort will be made to minimise these impacts.
- Construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.
- Timing of this work is subject to weather conditions and construction constraints.
