

Monaco Street Gold Coast Highway partial intersection closure

From Sunday night 28 April 2013, GoldLinQ will begin works at the intersection of the Gold Coast Highway and Monaco Street. Construction works will consist of underground service relocations, drainage installation, rail delivery, track laying and concrete pours. It is anticipated the works will take four weeks to complete, weather permitting.

Traffic changes:

- The centre median of the Gold Coast Highway opposite Monaco Street will be closed.
- Left in/left out access of Monaco Street only (see map).
- Periodic temporary single lane closures northbound and southbound on the Gold Coast Highway.
- Pedestrian access routes will be maintained around the construction area. Temporary footpath closures near the active work area may occur and alternative routes will be signed.

What to expect:

- Installation of safety barriers and fencing to contain the construction area.
- Heavy machinery, such as excavation and crane movements to facilitate construction activities.
- Construction noise, dust and vibration at times. Every effort will be made to minimise these impacts.
- The majority of construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.
- Periodic rail deliveries on the Gold Coast Highway at off-peak times.
- Timing of this work is subject to weather conditions and construction constraints.

Night works:

- Night works will be required as part of these works to minimise the impact on businesses, pedestrians and traffic. Affected businesses and residents will be notified in advance of night works.
- During night works vehicles will use "quacker" (quieter) style reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.

We apologise for any inconvenience and thank you for your patience during construction.
