

Major works at Ferny Avenue

From Monday 6 May 2013, a period of major construction will commence along Surfers Paradise Boulevard, between Ferny and Ocean Avenue, until the Gold Coast 600 event.

Day works:

Works will be carried out between 6:30am and 6:30pm, Monday to Friday.

- This will commence with two weeks of driven piling (repetitive hammering) to complete 40 piles adjacent to Golden Gate, creating a solid foundation for seven slab structures.
- Installing formwork and reinforcing then pouring concrete for the seven slab structures.
- Heavy machinery, such as excavation, concrete deliveries, crane movements to facilitate construction and track laying.

Night works:

At the conclusion of the driven piling, night works will commence between 6:30pm and 6:30am, Sunday to Friday (see map). This will involve:

- Installing formwork and reinforcing then pouring concrete for the seven slab structures.
- Heavy machinery, such as excavation, concrete deliveries, crane movements to facilitate construction and track laying.
- During night works vehicles will use “quacker” (quieter) style reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.

What to expect:

- Construction noise, vibration and dust. Every effort will be made to minimise these impacts.
- Upgrading and relocating services, above and below ground, such as Telstra, gas, water and electricity, and upgrading storm water drainage.
- Pedestrian access routes will be maintained around the construction area (see map). Temporary footpath closures near the active work area will occur and alternative routes will be signed.
- Timing of this work is subject to weather conditions and construction constraints.

Concrete pump with extended boom. used to pour concrete for rail.
