

Main Place construction update

From Sunday night 22 September 2013, underground service installations and storm water drainage works will continue at the southern end of Main Place. It is anticipated these works will take six weeks to complete.

Traffic changes:

- Main Place (Gold Coast Highway side) will become one way southbound. (See map). Note: This traffic change is part of the final alignment and will not be altered.
- Northbound access to Main Place is via Surf Parade and Queensland Avenue.
- Southbound access off the Gold Coast Highway is via Surf Parade and Queensland Avenue.
- Periodic car park spaces will be removed for tie-in works. These car parks will be reinstated.
- Pedestrian access routes will be maintained around the construction area (see map). Temporary footpath closures near the active work area will occur and alternative routes will be signed.
- Pedestrian access to the bus stop on the Gold Coast Highway will be maintained.

What to expect:

- Installation of safety barriers and fencing to contain the construction area.
- Heavy machinery, such as excavation and crane movements to facilitate construction activities.
- Construction will involve relocating services, above and below ground, such as gas, water and electricity, and upgrading storm water drainage.
- Construction noise, dust and vibration at times. Every effort will be made to minimise these impacts.
- The majority of construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.
- Timing of this work is subject to weather conditions and construction constraints.

Night works:

- Night works will be required as part of these works to minimise the impact on businesses, pedestrians and traffic. Affected businesses and residents will be notified in advance of night works.
- During night works vehicles will use "quacker" (quieter) style reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.
