

Night Works on the Gold Coast Highway

From Sunday 23 March 2014, night works to finalise the installation of street lighting in the centre median of the Gold Coast Highway, adjacent to Macintosh South Bridge, and complete finishing works including concreting will continue. These works are scheduled to take place at night to minimise the impact on traffic and are anticipated to take up to five nights to complete, weather permitting.

Night works:

- Single lane closures will occur on the Gold Coast Highway.
- Installation of temporary safety fencing and hoarding to contain the work area at night.
- Construction will include the use of heavy machinery, including vacuum excavators, to investigate underground services.
- Traffic management will be in place to assist pedestrians and motorists. Please drive to the conditions at all times during construction.
- Construction noise, dust and vibration may occur. Every effort will be made to minimise these impacts.
- The majority of construction work will occur from Sunday to Thursday, 6:30pm to 6:30am.
- During night works vehicles will use “quacker” (quieter) style reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.

We apologise for any inconvenience and thank you for your patience during construction.
