

Gold Coast Highway Traffic Changes

From Tuesday 22 April, a number of traffic changes will take place on the Gold Coast Highway southbound and at the intersection with Ocean Avenue. Construction is taking place to install a right turn into Ocean Avenue from the Gold Coast Highway northbound, as part of the final traffic configuration for the corridor.

Traffic changes

- The Gold Coast Highway will be reduced to one lane southbound from the intersection at Ferny Avenue to Pandanus Avenue.
- One lane of southbound traffic on the Gold Coast Highway will be diverted to Surfers Paradise Boulevard or Ferny Avenue.
- Ocean Avenue will be closed to traffic at the intersection with the Gold Coast Highway.
- Ocean Avenue will be reopened to two-way traffic from Surfers Paradise Boulevard.
- Local access to residents and businesses in Ocean Avenue will be maintained via Surfers Paradise Boulevard.
- Temporary traffic signals at the intersection of Ferny Avenue and Main Beach Parade will be reactivated during these works.

What to expect:

- Alternative routes and redirections will be signed. Please drive to the conditions at all times during construction as points of access, temporary lane closures and changes to traffic flow will occur.
- Installation of safety barriers and fencing to contain the construction area.
- Heavy machinery, such as excavation and vibration rolling, to facilitate construction.
- Works will involve underground service installations, construction of new footpaths, kerbing, and roadway.
- Pedestrian access routes will be maintained around the construction area. Temporary footpath closures near the active work area will occur and alternative routes will be signed.
- Construction noise, dust and vibration at times. Every effort will be made to minimise these impacts.
- The majority of construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.
- Timing of this work is subject to weather conditions and construction constraints.

Night works:

- Night works will be required as part of these works.
- During night works vehicles will use “quacker” (quieter) reversing alarms to reduce noise.
- Light towers will be placed to limit glare to nearby residences.
