

## Gold Coast light rail

### Demolition and site establishment works around Brighton Parade

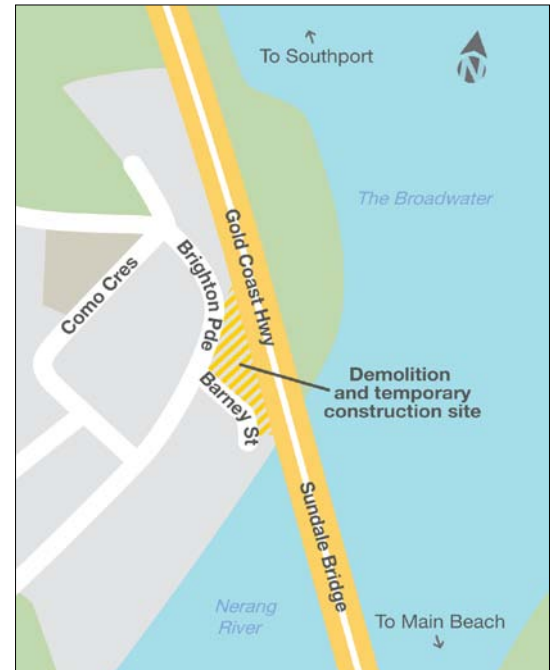

#### Construction of Stage One of Queensland's first light rail system has now commenced.

To facilitate the construction of the new light rail bridge over the Nerang River, GoldLinQ will establish a temporary site compound (laydown area\*) on Brighton Parade in February.

From mid-February, construction work will be carried out between 6:30am and 6:30pm, Monday to Saturday.

#### What to expect:

- Safety barrier, fence and site office installation.
- Traffic control to manage short-term lane closures for heavy vehicles and pedestrian movements.
- Construction machinery noise including reversing alarms.
- Temporary footpath closures near the active work area.
- Demolition of the vacant car wash property on the corner of Barney Street and Brighton Parade.
- Timing of this work is subject to weather conditions and construction constraints.

Map of work area

\* A laydown area is a piece of land that is cleared for the temporary storage of construction equipment and supplies.

#### About GoldLinQ:

In June 2011 GoldLinQ was awarded the contract to design, build and operate Stage One of the light rail system. In partnership with the State and Federal Government and the Gold Coast City Council, GoldLinQ will deliver a \$1 billion world-class public transport system for the Gold Coast scheduled to commence operations in 2014.

McConnell Dowell (MacDow) and Bombardier Transport (BT) Joint Venture are the design, construct and delivery arm of the GoldLinQ consortium. MacDow will design and deliver the track works, roadworks, bridges, station structures and buildings. BT will deliver the rail systems including design and installation, and bring into service the rail systems, rail power and light rail vehicle.

Thank you for your patience during the delivery of Queensland's first light rail system

Stage One is the 13-kilometre light rail corridor connecting Griffith University to Broadbeach, passing through the key activity centres of Southport and Surfers Paradise. As one of the fastest growing regions in Australia, the Gold Coast will be serviced by 14 light rail vehicles custom designed for the city. Once completed there will be 16 stations along the Stage One corridor.
