

Gold Coast Rapid Transit

Installation of work compound between Thornton Street and Wharf Road

Sunday 1 April 2012 to August 2012

Essential water main and storm water drainage upgrades need to take place on the eastern side of the Gold Coast Highway between Thornton Street and Wharf Road, Surfers Paradise. A work compound will be installed in this area (as per the map below) so that our workers can undertake these activities safely and as quickly as possible. Installation of the compound will also allow the vast majority of this work to be completed during the day. There will be no construction from 6 April until 9 April inclusive.

Works will involve:

- Installing barriers and fencing around the work compound.
- Relocating traffic lanes slightly west.
- The use of heavy machinery to excavate the ground inside the compound to install drainage and water pipes.

What to expect:

- The work compound will be installed in the evenings from Monday, 2 April to Thursday 5 April, between 6.30pm and 6.30am*.
- Hoarding used to secure the compound will not be installed until 10 April to aid local business visibility over the Easter long weekend.
- Aubrey and Frederick Streets, at the intersection of the Gold Coast Highway, will be closed from Tuesday 10 April for about three months*[^]. Motorists can access the Gold Coast Highway from these streets via Thornton Street or Fern Street.
- Pedestrian access to businesses will be maintained at all times.
- On occasion, property driveways may be affected. In these instances, residents and business owners will be provided with three days notice.
- Motorists and pedestrians are asked to drive/walk safely and observe all signage.
- Some noise may be experienced from the use of heavy machinery, however, every effort will be made to minimise impacts as much as possible. This includes planning the work so very noisy works such as concrete cutting is completed before 9pm when night works are required.

- Work compound
- Road closures
- Detour

If you have any questions about these works or to stay up to date with traffic, parking and construction changes in your area, call 1800 967 377 (select option 2).

*Timing of this work is subject to weather and construction conditions.

[^]Streets may be opened intermittently where construction schedule allows.
