

Gold Coast Rapid Transit

Southport bus changes

From Monday 22 November, TransLink bus routes 3 and 709 will be unable to travel along Queen Street between Wardoo and Nerang Streets due to the early construction works for the Gold Coast Rapid Transit project.

These routes will divert along local streets as follows:

- **Route 3** will divert in both directions via Nerang Street and Wardoo Street servicing existing bus stops used by routes 18A, 20 and 20A on Nerang Street, and a temporary bus stop on Wardoo Street near Queen Street, before returning to its normal route. There will also be minor changes to the timetable, taking into account this route diversion.
- **Route 709** will divert in both directions via High Street and Johnston Street, servicing a temporary stop on High Street near Nerang Street, existing bus stops used by route 5 on Johnston Street, and a temporary stop on Johnston Street near Wardoo Street before returning to its normal route.

Due to the staged nature of the construction works, temporary stops may need to be moved at short notice but every effort will be made to minimise impacts on customers.

Customers for Gold Coast Hospital

- Route 3 will continue to service the bus stops located outside the Gold Coast Hospital.
- Route 709 will now service temporary stops on High Street. Customers will need to walk a short distance to the hospital.
- Customers using route 709 travelling between the hospital and destinations along the Gold Coast Highway may find it easier to travel to/from Australia Fair on routes 3, 20 and 20A.

School bus services

School bus services to and from Southport State School and St Hilda's School will continue to operate as normal.

We apologise for any inconvenience and thank passengers for their patience during these important early construction works.
